

- ***Emerging methods for early precaution measure for good yield in agriculture***

Problem statement

1. Mohammed Yasmin S is an **exterminator**
Who needs to control pests
Because she wants to save plants.
2. Nagajothi A is a **meteorologist**
Who needs to forecast weather
Because she wants to help in controlling pest and other crop disease to spread over the field.
3. Ponchitra S is a **hydrogeologist**
Who needs to observe ground water levels, riverflow, evaporational cycles
Because she wants to make realistic solution for quality of food and water.
4. Priyadharshini P is a **farmer**
Who needs to maintain agriculture field in smart ways
Because she needs high yield.
